

**ELGIN COMMUNITY COLLEGE
HEALTH PROFESSIONS**

ANNUAL STUDENT TUBERCULOSIS SURVEY

Any student who has received the BCG vaccine or has had a positive Mantoux, must present a negative Chest X-Ray no more than one (1) year old. The student is required to complete and sign this survey on a yearly basis. Please complete and return to the Health Professions office to be included in your student health file.

It is important that you are aware of signs and symptoms of TB. Symptoms can be, but not limited to:

SYMPTOM	YES	NO
Chronic productive cough (lasting more than 10-14 days)		
Coughing up blood		
Shortness of breath		
Pleural or chest wall pain		
Easily fatigued / weakness / feeling of general malaise		
Loss of appetite		
Weight loss		
Fever		
Night sweats		
Being treated for an illness which lowers your resistance		
Blood in sputum		
Increased sputum production		
Other:		

If you should exhibit any of these symptoms, you, the student, are responsible for notifying the Program Coordinator and your health care provider immediately for further medical evaluation. You will be required to obtain a Health Release form from E.C.C. Health Professions office to be completed and signed by the health care provider stating that you are cleared to continue in the program. This form must be returned to your program coordinator before returning to the class/clinical.
