

## Science Team Meeting 5/13/13

Present: Ed Russell, Neal Ford, Heather Fellows, Brigid Trimble, Deb Gartshore, Janet Markwick, Terry Stroh, Heather Flick, Lesley Hollenberg, Elizabeth Becker, Tara Leszczewicz, Alison Douglas

Absent: Eric Jones, Barb Sydnor, Jennifer Tosello

Rubric is draft complete for 1a of CCSS ELA Standards for Writing in Science and Technical Subjects.

We have deleted from the rubric the "I can" statements from the mass rubric because they are not an efficient tool for the complete rubric 6-13 sliding rubric. They WILL be included in the student rubric at each level.

CCSS standard statement on the rubric shows 9-10 in regular font and 11-12 in italics. 6-8 standards and rubric columns will be incorporated next year.

Vision is an electronic document that shows all levels but written documents that only show one specific grade band (three grade levels for each rubric) which will include emerging, developing, meeting, and exceeding expectations for each grade band.

Next steps:

- Heather Fellows will google-ize the excel sheet
- Janet will share it with team
- Janet will draft explanation of rubric and post to google docs for team to review
- Team will provide feedback on both rubric and explanation by June 3
- Elizabeth and Alison will draft email and send rubric to the ECC Science Divisionals by June 10
- In the 2013 school year, the team will beta test the rubric with their classes and will start work on the b and c.
