Math Team 2007/2008 Summary
The math team compared course content in high school algebra I, algebra II and geometry to developmental courses at ECC, Math 096, 098 and 097, respectively, and found more similarities than differences suggesting the curriculum is aligned. In addition, the team identified skills high school students needed to be college ready. ECC math faculty strongly suggest four years of math in high school including one year of precalculus (includes trigonometry). Some high schools in the district currently only offer precalculus as an honors course. The high school team members have been very committed to the Alliance and should be acknowledged for their work.
